Lynden Archer receives chemical engineering award

Lynden Archer, the William C. Hoey Director and Professor of Chemical and Biomolecular Engineering, has received the 2014 Nanoscale Science and Engineering Forum (NSEF) Award from the American Institute of Chemical Engineers (AIChE).

Established in 2005, the award recognizes individuals who have made outstanding contributions to the advancement of nanoscale science and engineering in the field of chemical engineering.

Archer was recognized “for pioneering and sustained research on nanoparticle-polymer hybrid materials and their applications in electrochemical energy storage technologies,” according to his award citation.

Archer will give a lecture during the NSEF plenary session Nov. 19 at the 2014 AIChE annual meeting in Atlanta.
